7.1

Identify the sources and the effects of air pollutants.

7.2

Explain the causes and effects of photochemical smog and the methods to reduce it.

7.3
Describe thermal inversion and its relationship with air pollution.

7.4
Describe natural sources of carbon dioxide and particulates.

7.5

Identify indoor air pollutants**. Describe the** effects of indoor air pollutants**.**

7.6

Explain how air pollution can be reduced at the source**.**

7.7

Describe acid deposition. **Describe** the effects of acid deposition on the environment.

7.8

Describe human activities that cause noise pollution and its effects.
