

How to Succeed in AP Biology

1. Ask questions and keep asking until you get resolution, call me when you have questions that just can't wait.
2. Lay out a plan for the year and make short term goals.
3. Manage your time and adjust your yearly plan accordingly if needed.
4. Adapt if something you are doing is not giving you the results you want then change!, try another approach
5. Know the class expectations and procedures inside and out
6. Whatever work you do, do it well (passing the AP Exam, can save thousands \$)
7. Do some work at home, there is not enough class time by itself to be
8. Chunk, break your homework up into pieces it is difficult to work 2,3,4+ hours straight through and still retain the information.
9. Remember reading science is not like reading a novel, slow down and absorb the material.
10. Come to class, the opportunities, resources and environment are not available anywhere else.
11. Come to class prepared: have a plan for each day, bring prepared questions, your notebook, a writing implement and paper.
12. Work hard, time is your biggest enemy, try to take one day and one week at a time, it will all be over in the blink of an eye
13. Work smart, know why you are doing what ever it is that you are doing.
14. Do not cheat, the world has enough cheaters already...be excellent!
15. Ask questions and keep asking until you get resolution, call me when you have questions that just can't wait.
16. Understand that you and I succeed together and fail together...we are on the same team and have the same goals.

Do what you can, where you are, with what you have.

This is all I or anyone can ever ask of you
